

Is it possible that a retired chiropractor (Dr. Byan Ardis D.C.) may go down in the history books as being a person who was instrumental in revealing to the world the true nature of the plandemic covid con bio-weapon terrorism, genocidal crimes against humanity now being perpetrated by the industry\* all throughout this realm?

\*Rockefeller/Gates/Fauci pharmaceutical industrial complex and its various tentacles including but not limited to World Economic Forum, World Health Organization, Centers for Disease Control, Food and Drug Administration, Central Intelligence Agency, Mass Media, Energy, Education and Banking Cartels Et Cetera.

This is not a conspiracy. It's called a "coalition".

A coalition of international corporate giants and contract obligated governments all working together in unison as a world wide orchestra to orchestrate the things they do such as:

Declare an "emergency" exists that they have already been planning for decades so that all their tentacle-subsidaries are already well prepared to do whatever they will do.

Such as: Already having all the signs for the doors and the stickers for the floors already printed then installed over-night and ready for the next business day and activating all kinds of governmental "sleeper" contracts.

So that all is ready for all the sick people who are being exposed to some type of synthetic toxin 'venom' resulting in a new 'disease' with unusual symptoms that most 'licensed' doctors are not well trained to recognize.

Such as: The symptoms of envenomation which they can easily test for with an Enzyme-Linked Immuno-Assay (ELISA) test IF the licensed, industrial doctor actually does recognize the symptoms such as: fever, aches, nausea, fatigue, blurred vision, brain fog, ageusia, anosmia, clotting issues, kidney failure and edema caused NOT by a virus but by a TOXIN the patient was exposed to through various mechanisms such as direct contact, inhalation, ingestion, injection or even genetic modification causing the body to produce toxic proteins.

Is it possible this actually is an ancient biblical war between good and evil that actually does involve a serpent, genetic engineering and a retired chiropractor who did the research, discovered the truth and spread the word?

Is it possible the world has been exposed to 1. a synthetic formula of neurotoxic 'venom' peptides that are an anticoagulant and then the vaccine 'cure' being advertised and pushed by the Rockefeller/Gates/Fauci snake oil salesmen is 2. a different neurotoxic synthetic nanotech formula that causes clotting? (Two Different Snakes)
