

Child is a act/product of nature and nature's god and enters into the "foreign jurisdiction" of "imagination" where the "usufructuary interest" of Child is "surrendered" to "host nation" (custom of host nation) because "host nation" is "bankrupt" or "lacking" which is "imagination" because the universe is "infinite abundance." Child is "beneficiary" of the "account payable" of the "initial usufruct" due to "exposure" or "pledge" of "full faith and credit" of which the "beneficiary" of the "account receivable" has already made use of as evidenced by "notes in circulation" which those "notes" are "pitted" against "other users of the account receivable" to determine "value" with respect to each other, but the whole of the "users of the account receivable" have a duty to service the original "account payable" in order the "books be balanced" due to the "inherent double entry bookkeeping system" of "usufruct". Everything is there for all to use, the only thing left to determine is what side of the "account" does one "reside"

Functional and operational disclosure of this "public trust" is last line of Declaration of Independence  
 Functional operation of this public trust is Job 32: 21-22

Everything else is a "test" in harmony with Book of Job done in an effort to help man learn to "govern himself" instead of relying on the need to governed.
