

# Medical Experiments

Such as medical procedures (quarantine-lockdown), medicines (vaccines) and devices (face masks, respirators and ventilators) now being utilized **experimentally** (as never done before) are absolutely subject to **Many Laws** including but not limited to-

## **Nuremberg Code: Point #1**

The **voluntary consent** of the human subject is **absolutely essential**. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him/her to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonable to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.

## **Nuremberg Code: Point #5**

No experiment should be conducted where there is a prior reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.

## **Nuremberg Code: Point #7**

Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability, or death.

## **Nuremberg Code: Point #9**

During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.

## **Nuremberg Code: Point #10**

During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

Study the above five points of law and COMPREHEND their applicability.

Any person, agent or agency in violation of this and other applicable law may be a party to  
**Crimes Against Humanity**
